## BEFORE PROCEDURE

- Patients prone to cold sores/fever blisters should take an anti-viral prior to treatment.
- Please do not drink alcohol, coffee or take aspirin 24 hours prior to the treatment.
- Do not shape or wax your brows before the procedure. Your technician will shape brows during the procedure.
- No electrolysis for at least 5 days before the procedure.
- Exfoliating treatments such as microdermabrasion or Vitamin A / Retinol should not be performed/used within 2 weeks prior to procedure.
- Chemical and laser peels should be avoided no less than 6 weeks prior to procedure.

## AFTER PROCEDURE

- Apply aftercare (vaceline) daily or twice a day for 6 weeks.
- Do not apply make-up directly on your brows during healing process.
- No peroxite or neosporin on treated areas.
- Do not get eyebrows wet for 7-10 days during healing, should they get wet do not rub but pat dry.
- Do not rub, scratch or pick during healing process.
- Should your eyebrows scab or become itchy do not scratch but gent tap.
- Please be aware that color intensity will be significantly darker and sharper immediately and a few days after the initial procedure, but the color will reduce by 30-50%.
- Book your perfecting touch up 6 weeks after treatment.
- Avoid excess sun or tanning beds, this will make them fade.
- Avoid ALL daily skincare products on brow area for 6 weeks.
- Our pigments are MRI safe but do inform your doctor should you need scan.
